2022 AWAKE RÄVIK 3

The Awake RÄVIK 3 is the most accessible and versatile electric surfboard. It has been designed to provide an easy, stable and controlled first ride but offers the optimal platform to grow and learn with the board until the riders master cruising, carving and other tricks.

The robust construction and adapted shape allow slow, stable rides but will perform perfectly when releasing the high power it can push, giving the opportunity to our riders to discover, learn and grow in this sport until getting the most out of the session with friends, family and solo explorations. This is the board to becoming an electric surfer.

Playfulness and versatility have been core aspects in the development of this equipment. The RÄVIK 3 board is shaped to deliver stable and controlled rides. The hull features a balanced combination of forgiving and performant aspects to offer the easiest but most thrilling riding experience.

Our linear jet system ensures consistent and constant grip increasing stability and control, our first-time riders can enjoy a natural and comfortable feeling.

The full deck pad with evolutive foot strap options allows the rider to learn and evolve at their own pace and find their very own riding style with complete freedom.
